SITUATION SUMMARY

Northern California

Cal OES Deployment Northern California Geographic Coordination Center

- Cal OES Assistant Chief Clary assigned

Northern California Fires (see *Fire Activity Section* for additional information):

Monticello Vegetation Fire, Yolo County (Update)

Fire Information:

Highway 128 near the Monticello Dam, Winters, Yolo County

Per Cal OES Fire Duty Officer and ICS 209 dated 07/09/14 at 0500 hours:

- SRA
- Start Date / Time: 07/04/14 at 2130 hours
- 6,488 acres, 74% contained
- Total Personnel Committed: 1533
- The Canyon Creek area is still under an evacuation advisory
- No significant fire growth today, the fire is currently holding at Enos creek.
- Two Cal OES Assistant Fire Chiefs are assigned with one Support Unit
- Public Safety Communications has two technicians assigned to the incident

Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought
- Mariposa County has submitted a Resolution to continue their local drought emergency dated July 8, 2014.

Monticello Vegetation Fire, Yolo County

OF EMERGENCY SERVICES

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

Coastal areas of northwest California will continue to see nighttime and morning clouds and fog with some afternoon clearing. A series of weak systems will bring the slight chance of isolated storms over interior northwest California Mountains each afternoon into this weekend.

San Francisco Weather:

A deepening marine layer and persistent onshore flow will result in cooler temperatures spreading farther inland through the rest of the week. High pressure building over the west will cause a warming trend during the early part of next week.

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY

Sacramento Weather:

A few showers or thunderstorms will be possible over some mountain areas over the next few days. Otherwise mainly fair skies are expected through the middle of next week with near or a little above normal temperatures.

Hanford Weather:

High pressure over the region will weaken the next few days, with temperatures cooling a few degrees daily through Friday. There will be slight chances of afternoon and evening showers and thunderstorms over the Sierra Nevada through Thursday as some monsoonal moisture moves into the area. High pressure will return this weekend for a warming trend for the first part of next week.

WEATHER

WEATHER SYNOPSIS BY REGION:

SOUTHERN CALIFORNIA:

Los Angeles Weather:

Upper level high pressure centered over the four corners region will shift east as weak low pressure develops off the west coast bringing a cooling trend for inland areas through the end of the week. A warm-up is then likely for the weekend and early next week as high pressure expands west again. Monsoon moisture and a slight risk of thunderstorms for the mountains and desert may return as well.

Extreme Southwestern California Including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

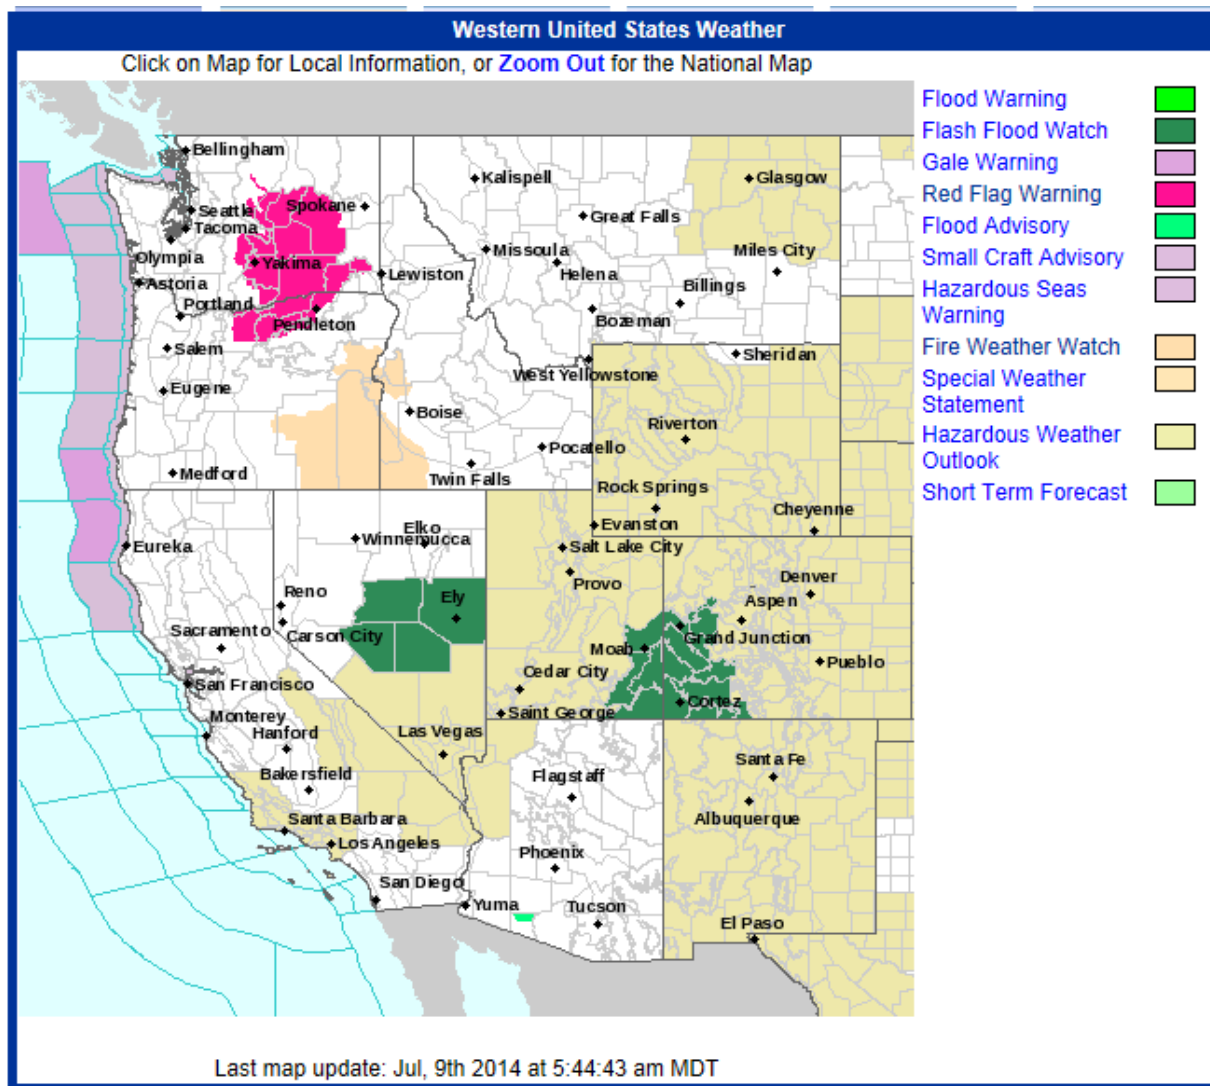

Slow drying of monsoonal moisture will continue through Friday, though with some continuing afternoon clouds for the mountains. West of the mountains, onshore flow and a weak coastal eddy will bring slow deepening of the marine layer and slow cooling into Thursday. For Friday into early next week, high pressure to the east will begin to strengthen bringing warming and a shallower marine layer. For the weekend into early next week, it will also help direct increasing of amounts of monsoonal moisture into southern California with the chance of thunderstorms returning by Sunday or Monday.

Southeast California Weather:

Moist monsoon flow will prevail through the middle of next week across the region, with varying afternoon and evening chances for showers and thunderstorms. Rainfall opportunities through Thursday appear a bit more favorable than over the weekend as somewhat drier air may temporarily sneak in from the west. Due to elevated moisture values, high temperatures each day will stay near or slightly below seasonal normals.

CAL OES ACTIVATIONS

Cal EOC Incident – 2014 Drought

- The SOC is activated at Level 2 in support of the Drought State of Emergency from 0800-1700 hours daily.
- The Inland REOC is activated at Level 2 from 0800-1700 Monday through Friday or as needed.
- The Southern REOC is activated at Level 1.
- The Santa Barbara County OA EOC is activated at Level 2 to be handled by the duty officer for the purpose of monitoring activities and gaining situational awareness. The operational period is Monday – Friday, 0800-1700 hours.

Situational Summary

On January 17, 2014 Governor Edmund G. Brown proclaimed a State of Emergency and directed state officials to take all necessary actions to prepare for drought conditions. The State Operation Center (SOC) is activated to implement objectives in support of the Governor's priorities. The lack of winter rain and snowfall has resulted in extremely dry conditions in many parts of the State. Reservoir levels are down significantly from where they should be on average for this time of year. If conditions continue severe impacts to municipal water supplies, agriculture (plants and livestock) and firefighting capabilities are likely in store for the State over the next few months. Negative economic impacts will also result.

The drought could result in severe impacts to the municipal water supplies, wells, agriculture (plants and livestock) and firefighting capabilities for several months. The SOC continues to be activated to monitor the situation statewide, and support regional and local operational areas.

- On 7/8/14 the State Water Board will publicly release proposed water conservation requirements to reduce water waste across the state. These proposed emergency regulations include mandatory restrictions on water use, and will be considered by the Water Board on 7/15/14.
- California Department of Fish and Wildlife staff evacuated trout from a major hatchery on the American River last week to avoid a massive die-off of fish due to increased water temperatures in the hatchery. Over two million fish are being relocated and released earlier than normal due to drought conditions.
- The Taskforce continues to meet regularly to take actions that conserve water and coordinate state response to the drought.
- Cal OES continues to gather drought-related costs from state agencies and local governments.

Situational Summary

Open Burn Ban in effect across the state: Open burning is now prohibited on 31 million acres of land across the state, due to a burn ban that CAL FIRE has directed each of its unit chiefs to implement. This ban on open burning in state responsibility areas (outside of cities and towns) reduces wildfire danger amidst extremely dry conditions.

The National Weather Service provided the following synopsis for the relationship of Blowing Dust Advisories and the drought conditions in southeast California: Dust storms are common due to increased thunderstorm activity and the winds produced with these storms, during monsoonal flows. The severity of the dust storms could be locally exacerbated by drought conditions. In any event, the public should monitor NWS for any advisories and warnings issued by NWS.

On July 1 2014, administration of the CDPH Drinking Water Program (DWP) transferred to the California State Water Resources Control Board (SWRCB) Division of Drinking Water. CDPH and the SWRCB entered a Memorandum of Understanding outlining a three-month transition period during which drought response activities and any other emergencies will be coordinated jointly between the two organizations.

CAL OES MISSIONS

Ongoing Cal OES Missions

- **2014-LAW-2798**, El Dorado County is planning an in-county SAR exercise on 07/15/14 for their volunteers and have requested the assistance of the California National Guard (CNG) aviation assets to support the exercise. Elements of the exercise will include an orientation to the various CNG air assets (H72, H60 and CH47), hoist training, patient packaging for air evacuation and ground team insertion and extraction training.
- **2014-LAW-2481**, The 95th CST will provide area monitoring, secure communications, and WMD expertise for the NHRA Racing Event at Sonoma Raceway July 25-27, 2014. They will assist with advanced planning and be pre-positioned prior to the start of the event.
- **2014-LAW-2483**, The 95th CST will provide area monitoring, secure communications, and WMD expertise for the IRL Racing Event at Sonoma Raceway August 22-24, 2014. They will assist with advanced planning and be pre-positioned prior to the start of the event.

Mission:

We protect lives and property, build capabilities, and support our communities for a resilient California.

We achieve our mission by serving the public through effective collaboration in preparing for, protecting against, responding to, recovering from, and mitigating the impacts of all hazards and threats.
